SUBJECT INDEX TO VOLUME 16

Abstracts
  Duration of the speech dysfluencies of beginning stutterers, 169
  Filled pauses and gestures: it's not coincidence, 237
  A fluency disorders prevention program for preschoolers and children in the primary grades, 235
  Fluency, dysfluency, and aging, 168
  The perception of speech rate from the sound-silence patterns of monologues, 237
  Respiratory and laryngeal function during whispering, 170
  Social anxiety and stuttering, 236
  The structure of disfluency behaviors in the speech of adult stutterers, 168
  Task complexity and manual reaction times in people who stutter, 167
  Thalamic-induced stuttering (surgical observations), 167
  A theory of neuropsycholinguistic function in stuttering, 236, 323
Acoustic intensity display, in biofeedback therapy, 242
Acquired dysfluency, distinguishing psychogenic from neurogenic etiology, 3
Adults, structure of dysfluency behaviors in, 168 (abstract)
Aging, speech motor control system affected by, 168 (abstract), 207, 219
Alzheimer's disease, language affected by, 168 (abstract)
Anoxic encephalopathy, acquired dysfluency after, 3
Anticipation, among elementary school stutterers, 25
Anxiety neurosis, in psychogenic dysfluency, 6
Aphasia, neurogenic dysfluency associated with, 5
Apraxia of speech, neurogenic dysfluency associated with, 5
Articulation
  motor performance, age and task complexity variables in, 219
  in school-aged stutterers, 16
Articulatory physiologic events, evaluation of, 241
Aspirated consonants, in neurogenic dysfluency, 4
Assertiveness ratios, for parents of stuttering and fluent children, 125
Assessment Review
  Stuttering Severity Instrument for Children and Adults (revised), 309
Atypical communication disorders, reporting of, 55
Atypical stutterers, characterization of, 229 (book review)

Beginning stutterers, duration of speech dysfluencies of, 169 (abstract)
Bilateral cerebral hemisphere damage, in neurogenic dysfluency, 4
Biofeedback therapy, visual, in remediation of stuttering, 241
Blocks, in school-aged stutterers, 15
Bobulation, as new definition of speech repetition, 329
Book Reviews
  The Atypical Stutterer, 229
  Clinical Management of Childhood Stuttering, 317
  Help! My Child is Starting to Stutter, 232
  Help! This Child is Stuttering, 231
  Working with Stuttering, 159
Brain tumor, in neurogenic dysfluency, 4
Broken words, in word-final position of phrase or clause, 55

Central nervous system (CNS), acquired damage to, in neurogenic dysfluency, 3
Central processing, in stutterers and nonstutterers, 101
Cerebral damage, in neurogenic dysfluency, 4

Cerebrovascular disease, in neurogenic dysfluency, 4
Chest wall displacement, visual feedback of, 242
Child-only gaze, in categorization of mother-child gaze behavior, 181
Choral reading, psychogenic fluency response to, 5
Clinical Evaluation of Language Fundamentals-Revised (CELF-R), receptive and expressive language development assessed via, 289
Clinical management, of childhood stuttering, 317 (book review)
Communication disorders, coexisting, in random sample of school-aged stutterers, 13
Communicative situations, exposure to different, psychogenic fluency response to, 5
Consonants, in neurogenic dysfluency, 4
Conversion reaction, in psychogenic dysfluency, 6

Delayed auditory feedback, psychogenic fluency response to, 5
Depression, in psychogenic dysfluency, 3
Dysarthria, neurogenic dysfluency associated with, 5

Electroglottograph (EGG), in stuttering assessment, 242
Electromyographic (EMG) feedback, in reduction of muscle tension, 243
Epilepsy, acquired dysfluency after, 3
Expressive language development, assessment of, 289
External time pressure, influence of on voice onset times, 143
Eye contact, between child stutterers and their mothers, 173
Eyemarking study, of anticipation and dysfluency among elementary school stutterers, 25

Family, five generations of, stuttering in, 117
Filled pauses, occurrence of, 237 (abstract)
Fixation, eye, among elementary school stutterers, 25
Fluency disorders prevention program, for preschoolers and children in primary grades, 235 (abstract)
From the Desk of the IFA President
International Fluency Association priorities: a poll of potential members, 335

Gestures, occurrence of, 237 (abstract)
Glottal stop insertion, within-vowel, in speech of adult male, 55
Goldfarb-Halpern Word-Association Test, in assessment of response latency and response class, 35

Handedness, in neurogenic dysfluency, 5
Headache, in neurogenic dysfluency, 5
Head trauma, in neurogenic dysfluency, 4
Hearing, in school-aged stutterers, 17

Inductive plethysmography, in monitoring respiratory movement, 242
Infarcts, cerebral, in neurogenic dysfluency, 5
Instrumented method, for assessment and remediation of stuttering, 241
International Fluency Association (IFA)
establishment of, 71
founding articles of, 79
news of, 73, 345
organization of, 1
priorities of: a poll of potential members, 335

Language, effect of on perception, 328 (letter to the editor)
Language disorders, coexistence of with speech disorders, in school-aged stutterers, 13
Language elicitation tasks, effects of on dysfluencies of stuttering and nonstuttering children, 275
Laryngeal function, during whispering, 170 (abstract)
Laryngeal reaction time profiles, in relation

to linguistic performance deficits, 85
Laryngeal shift, in stutterers and nonstutterers, 101
Learning disabled students, stories produced by, 290
Left anterior cerebral area, acquired damage to, in neurogenic dysfluency, 4
Letter to the Editor
How to rid yourself of stuttering in under 60 seconds, 327
Thoughts about a great stuttering therapist: an open letter to Charles Van Riper, 239
Linguistic performance deficits, in stutterers, relation to laryngeal reaction time profiles, 85
Linguistic time pressure, influence of on voice onset times, 143
Liquid consonants, in neurogenic dysfluency, 4
Listener attitudes, toward stuttering speakers, 201

MacSpeech software, response latencies calculated using, 35
Manual reaction times, in stutterers, 167 (abstract), 207, 219
Medication, effect of, on neurogenic dysfluency, 4
Mercury strain gauges, in assessment of prephonatory respiratory kinematics, 242
Molar dysfluency, characterization of, 244
Monologues, sound-silence patterns of, speech rate perception from, 237 (abstract)
Mother-child gaze behavior, young childhood stuttering and, 173
Motor performance, age and task complexity variables in, 207, 219

Narrative ability, in school-age stuttering boys, 289
Neither gaze, in categorization of mother-child gaze behavior, 181
Neurogenic dysfluency
distinguishing from psychogenic dysfluency, 3
within-vowel glottal stop insertion and, 55
Neurological diseases, progressive, in neurogenic dysfluency, 4
Neuropsycholinguistic function, theory of, in stuttering, 236 (abstract), 323 (abstract)
Noninvasive laboratory instrumentation, for assessment and remediation of stuttering, 241
Nonword fillers, in school-aged stutterers, 15

Obstriction, as new definition of dysfluency, 329
Overt dysfluency, characterization of, 244

P300 brain potentials, in stutterers and nonstutterers, 101
Parental interactions, patterns of assertiveness and responsiveness in, with stuttering and fluent children, 125
Perceivable dysfluency, characterization of, 244
Perception, effect of language on, 328 (letter to the editor)
Personality disorder, in psychogenic dysfluency, 6
Phonatory signals, evaluation of, 241
Phrase repetitions, in school-aged stutterers, 15
Planning and execution of speech, deficits in, stuttering associated with, 85
Pneumotachograph system, monitoring articulatory-laryngeal- respiratory coupling effects on airflow with, 242
Prolongations, in school-aged stutterers, 15
Pseudoseizures, acquired dysfluency after, 3
Psychiatric difficulties, coincidence of psychogenic dysfluency with, 6
Psychogenic dysfluency
distinguishing from neurogenic dysfluency, 3
within-vowel glottal stop insertion and, 55

Questionable gaze, in categorization of mother-child gaze behavior, 181

Receptive language development, assessment of, 289
Respiratory function, during whispering, 170 (abstract)
Respiratory kinematic signals, evaluation of, 241
Response class, word association task in measurement of, in stutterers and nonstutterers, 35
Response latency, word association task in measurement of, in stutterers and nonstutterers, 35
Responsiveness ratios, for parents of stuttering and fluent children, 125
Right cerebral hemisphere, acquired damage to, in neurogenic dysfluency, 4

Saccadic movements, computer-controlled eyemarker in tracking of, in elementary school stutterers, 25
School-age stutterers
  coexisting communication disorders in, 13
  eyemarking study of anticipation and dysfluency in, 25
  narrative ability in, 289
Sentence-imitation task, effects of on dysfluencies of stuttering and nonstuttering children, 276
Sentence-modeling task, effects of on dysfluencies of stuttering and nonstuttering children, 276
Sex-modified trait hypothesis, of genetic transmission of stuttering, in five generational family, 117
Silent reading, among elementary school stutterers, 25
Singing, psychogenic fluency response to, 5
Single syllable target words, in voice onset time studies, 143
Social anxiety, role of in stuttering, 236 (abstract)
Sounds, in neurogenic dysfluency, 4
Sound-silence patterns, of monologues, speech rate perception from, 237 (abstract)
Sound/syllable repetitions, in school-aged stutterers, 15
Spasticity, acquired dysfluency after, 3
Speech disorders, coexistence of with language disorders, in school-aged stutterers, 13
Speech interruptions, idiosyncratic, characterization of, 244
Speech physiology, noninvasive laboratory instrumentation for assessment of, 241
Speech rate, perception of, from sound-silence patterns of monologues, 237 (abstract)
Status epilepticus, acquired dysfluency after, 3
Story grammars, characterization of, 289
Structure of disfluency behaviors, in speech of adult stutterers, 168 (abstract)
Stuttering. *See different aspects of stuttering*
Stuttering severity instrument, for children and adults, 309 (assessment review)
Subperceptual behaviors, characterization of, 244
Symptom reversibility, diagnostic importance of in distinguishing psychogenic from neurogenic etiology, 3
Syntactic complexity, effects of on dysfluencies of stuttering and nonstuttering children, 275

Task complexity, in stutterers, 167 (abstract), 207, 219
Test for Auditory Comprehension of Language-Revised (TACL-R), in receptive language assessment, 290
Test of Language Development-Primary (TOLD-P), in expressive language assessment, 290
Thalamus, in induction of stuttering, 167 (abstract)
Time pressure, externally and linguistically imposed, influence of on voice onset times, 143
Treatment, of stuttering, 159 (book review)

Van Riper, Charles, open letter to, 239 (letter to the editor)
Vibratory onset, in stutterers and nonstutterers, 101
Vocal fold vibration, in stutterers and nonstutterers, 101
Vocal motor function, in stutterers and nonstutterers, 101
Vocal reaction times, in dysfluent children, 207, 219
Voice, in school-aged stutterers, 16
Voice onset times, in stuttering and nonstuttering children, 143
Voice reaction times, in stuttering and nonstuttering children, 143
Weakness, diffuse, acquired dysfluency after, 3
Whispered speech
  respiratory and laryngeal function during, 170 (abstract)
  within-vowel glottal stop insertion in, 55
White noise, psychogenic fluency response to, 5
Word association task, response latency and response class for stutterers and nonstutterers as measured by, 35
Word fillers, in school-aged stutterers, 15
Wordlist, presented to elementary school stutterers, 25
Word repetitions, in school-aged stutterers, 15
